<p>Nome: Luan Rafael Domingos Santana</p>

<p>Data de nascimento: 13/03/1991</p>

<p>Local: Campo Grande - MS</p>

<p>Signo: Peixes</p>

<p>Altura: 1,75 cm</p>

<p></p><p>The TL;DR version of this review is: surprising ligh

t, extremely pocketable, does the job, not my dream charger but at the price it

s well worth it.</p>

<p>We've covered a product of Lepow's before, the Moonstone. Like the Moon

stone, the Poki comes with a cloth carrying case that you can stash a USB cable

in (it appears to come with a 6-pin USB-> MicroUSB,) or chuck your ID and credit

card in and use it as a wallet while you're out. It's actually the first thing

that stood out when I was looking at the device. The Moonstone is still going st

rong with a friend of mine a year later.</p>

<p>The battery delivers a 90% conversion efficiency rating according to sp

ecs on the manufacturer's website. Most batteries go from the high 70's to mid 8

0's. You want to see a higher number as this is how much power gets delivered wi

th the rest being lost in conversion.</p>

<p>The Poki can charge and recharge at 2.1amps. This means you're not stuc

k for 20+ hours charging a 10,000mAh battery at 500mA. At 2.1 amp you should be

able to charge this in under five hours and with 90% conversion efficiency you s

hould have around 9000mAh of actual juice to spare. That should be enough for at

least three complete charges from dead to full for any smartphone on the market

today.</p>

<p>2.1 amp charging also means you're not going to spend ~7 hours charging

a 3000mA phone from dead, more like an hour and a half if your phone supports i

t.charging that fast.</p>
