To create a link that opens an app, you will need to use a special type of link called a "deep link" or "app link". A deep link is a URL that is designed to open a specific page or resource within an app, rather than a web page.

How do you create a link that opens an app? - Quora

How to open link in app instead of browser?

Click on Apps and select the preferred applications from the list.

Under application info, scroll down and click the Open by default option

Go to Settings on your phone.

Click on Apps and select the preferred applications from the list.

Under application info, scroll down and click the Open by default option

Go to Settings on your phone.

Click on Apps and select the preferred applications from the list.
