<p&gt;&lt;/p&gt;&lt;p&gt;The TL;DR version of this review is: surprising ligh
t, extremely pocketable, does the job, not my dream charger but at 🍌 th
e price it s well worth it.</p&gt;
<p&gt;We ve covered a product of Lepow s before, the Moonstone. Like the Moon
stone, the Poki comes 🍌 with a cloth carrying case that you can stash a
USB cable in (it appears to come with a 6 ‡ 🍌 USB-> MicroUSB,) or ch
uck your ID and credit card in and use it as a wallet while you re out. It
27820; actually the first thing that stood out when I was looking at the device
```

. The Moonstone is still going strong 🍌 with a friend of mine a year la ter.</p> <p>The battery delivers a 90% conversion efficiency rating according to sp ecs on the 🍌 manufacturer s website. Most batteries go from the high 70 s to mid 80 s. You want to see a higher number as 🍌 this is how much p ower gets delivered with the rest being lost in conversion.</p> <p>The Poki can charge and recharge at 🍌 2.1amps. This means you re not stuck for 20+ hours charging a 10,000mAh battery at 500mA. At 2.1 amp you should 🍌 be able to charge this in under five hours and with 90% conversion efficiency you should have around 9000mAh of 🍌 actual juice to sp are. That should be enough for at least three complete charges from dead to full for any 🍌 smartphone on the market today.</p> <p>2.1 amp charging also means you re not going to spend ~7 hours charging a 3000mA phone 🍌 from dead, more like an hour and a half if your phone

<:p>:<:/p>:<:p>:r accounte and Gett-right Intos the Action. Just like

supports it.charging that fast.</p>
