Terrible game.

Terrible game.

Terrible game.

Terrible game.

Terrible game.

Terrible game.

I just bought this, as I was looking for a game that is exactly this

is premise. Alas, when I found this game, I bought it and I was extremely

disappointed. Just loading up the game took forever, and I kept having to close and

reopen it. When it finally opened, it took 17 minutes just to do that. Yeah.

Now it's not like I have a terrible laptop, my laptop is really good and

I've never had any issues with such a thing. Then, upon opening

the game, I couldn't look around because the default settings were set to

ultra. For the record, I don't really have an issue with game devs doing

this, but it leaves a bitter taste in your mouth. I had to set the quality

to very low and even then it was still so laggy. It was 2 fps at the most.

It was quite literally just pixels. The game was also very repetitive,

so even if you have a NASA super-computer you will get bored of this

really quickly. I do not suggest this to anyone, no matter how enticing it

looks. It was terrible and so incredibly frustrating; especially because I kept

having to meddle with the settings and make the game actually playable.
